

# ***G6 BT Interphone***

New version

**Hi-Fi speakers, Top sound quality!**

## **USER MANUAL**

*Cool multifunctional communication tool for motorcyclists !!*

## Main Features:

Communication in **6** riders, one rider can pair with 5 riders, and can choose which person of the group to talk at a time.  
real full duplex wireless communication in **6** riders by bluetooth system

Maximum talking range **1000** meters

Up to **120Km/h** working speed

Up to **9 hours** talking time

Safe **auto-receiving** cell phone calls

Advanced **A2DP & EDR** bluetooth profile , **Top sound quality, with new Hi-Fi speakers in this new version of G6 intercom**

**Stereo music/audio** function(transmits from A2DP enabled **cell phone/MP3/GPS**)

**Line in** audio interface, can connect with any audio source

Wind noise DSP cancellation

Water-resistance, full weather

## Introduction :

We will describe this communications kit as **G6**( a Group can contain maxium 6 riders)

This **G6** can either be used for rider or for pillion.

This **G6** can connect with three kinds of bluetooth devices: a bluetooth enabled cell phone, five **G6** (or: four riders and 1 pillion), an audio source which with a built in or a external audio bluetooth transmitter.

This **G6** is a multifunctional device for motorcyclists and skiers, it can be used:

1) **As a handfree bluetooth headset for cell phone calls,**

while out riding, the auto answer feature of the internal Bluetooth profile enables safe automatic handfree answering of the phone call automatically. It also offers a call rejecting function.

—receive the cell phone calls even you do not need to press any button, you just need to rider

your bike **as normal**, the process of receiving call will be automatic, after ring on of the call about 5 seconds , it will receive the call automatically.

2) **As a two way wireless full duplex interphone in 6 riders or between rider & pillion,**

**Any rider could choose one of 5 riders to talk at a time !**

The maximum communication range over a high clear line of sight path can reach **1000m !**

(this maximum range is not guaranteed).

Typical effective range in city is approximately 700m. Please note that actual range will depend on weather conditions, terrain, presence of obstacles i.e. a large vehicle, buildings non line of sight etc.

Unlike a one-way walkie talkie, which is only half duplex i.e. it can not speak and listen simultaneously, the **G6** offers real-time talking like a normal telephone.

It can connect with 5 other riders or connect with anther rider and his/her pillion.

The rider can chose which person to talk with

**The working speed can be up to 120km/h !**

3) **As a wireless bluetooth stereo music receiver and speaker,** this **G6** has **EDR** and **A2DP** profile , with **EDR** and **A2DP** profile it can offer another important function--- listening to stereo music from **A2DP** enabled cellphone,MP3 or navigation audio information from GPS(this MP3 or GPS should has a built in audio bluetooth transmitter)

4) **As a bluetooth headset for receiving GPS navigation audio instructions** (this GPS should have a built in bluetooth transmitter)

5) **As the speakers of your MP3/GPS**

If your MP3 or GPS is not Bluetooth transmitting enabled and you have not a Bluetooth AV dongle, this **G6** also offers another method of listening to the stereo music/audio info--- the simple wired method. Plug the audio source directly into the **G6** via the 2.5mm-3.5 mm stereo connection cable.

Clip

Inserted plate

**Hi-Fi** Speakers/Boom Microphone/audio plug

## The AC & USB Charger

Note: Different country may has different adaptor

### Before using: Charging the G6

Before using this device, Please charge the **G6** main device at least three hours.

We have provided you with the ability to charge the system via the USB port of your computer or if you are away on a trip, you can use the supplied Multi-voltage USB power adapter.

The charging cable has a small USB plug for the headset and the large USB plug for the computer or AC adapter, please observe to correct orientation of the USB plug and socket before inserting

- 1) Insert the 2.5mm plug of the charging cable, into the small charging jack of the **G6**, you can either charge by computer or AC adapter.
- 2) While charging, the red LED on the headset module will illuminate,  
When the charging is finished, the red LED will extinguish.

**Note:** if you do not use the **G6** for **a month or more**, to protect the Poly-Li battery, please charge the **G6** at least every month.  
(The fault damaged by wrong charging will be not guaranteed).

### Attaching and removing the G6 main unit on your helmet

With the clip, you can easily mount the main unit of the G6 on a helmet within 3 minutes.

#### Step:

- 1) Find a best position on the **left** side of your helmet to put the clip
- 2) Insert the inserted plate between shell and foam of the helmet

**Fix the clip on the helmet with the screws**

- 3) hang the main unit of the **G6** on the clip

Clip

Inserted plate for clip

Insert the plate between the shell and the foam of a helmet, fix with screws

Clip fixed on helmet

G6 mounted on a helmet

## Attaching the two speakers and the microphone

**The success of the system depends on the careful positioning of the ear speakers directly over top of the ear canals. this will give the best signal to noise of the received audio..**

- 1) To find the position of your ear canals, put your helmet on firmly but don't do it up. Slide your thumb of one hand up between the inside of the helmet and your ear, with the fingers of that hand on the exterior of the helmet. Feel the ear canal in your ear with your thumb and then grip the helmet firmly between thumb and fingers of that hand, carefully take the helmet off BUT don't move your thumb from its position inside the helmet. Look at where your thumb is! This place marks the centre of the ear speaker! Mount the Velcro pad to which the speaker will attach there, inside the helmet, Check the other side for optimum ear speaker position.

- 2) Remove the protective backing of the Velcro and mount the Velcro pads in the correct positions, attach the two speakers on the Velcro inside your helmet, the speaker with **short** wire cord for **left** ear, the speaker with long wire cord for right ear.

the speaker with **short** wire cord  
for **left** ear

the speaker with **long** wire code  
for **right** ear

### **Adjust the position of the microphone**

**Note:** *To reduce the external noise, you need to close the visor while riding, and please adjust the position of the microphone to be right in front of your mouth with the foam just touching your lips, the visor should cover the microphone effectively! (Minimizes wind noise contribution)*

**V**

**Correct** position of the microphone

**X**

**Wrong** position of the microphone

- 3) Plug in the positioned headset to the communications module and attach it to the side of the helmet.

### **Operation:**

The operation is friendly and very easy.

### **Pairing with your Bluetooth phone for the first time**

**Note:** *You must have a Bluetooth enabled phone to “Pair” with the G6*

*The rider and pillion pairing their headsets with their respective mobile phone should be at different time,*

Before using the G6, please familiarize yourself with Bluetooth function of your cell phone. Read the instruction manual that came with the phone so you can enable its Bluetooth function.

Before you can use this **G6** in combination with your phone, you will need to “pair” it with your cell phone for the first time. This usually only needs to be performed once with that individual phone however follow the instructions supplied by the phone manufacturer and save the “pairing” so it will be automatically connected when this Phone and the **G6** come into contact again.

- 1) Enable the Bluetooth function on your cell phone. **Short press (< 1 second) Reset key on the G6.**
- 2) You must place the **G6** in “Pairing mode”, this is done by way of a holding down the Power/Interphone key on the headset, until the red & blue LED flash alternately.
- 3) Begin the “searching for Bluetooth device” on the cell phone according to the phone’s instructions
- 4) when the **G6** is discovered, the cell phone will display **MOTOR PHONE** select this and accept the connection
- 5) The cell phone will ask you to input a password to enable this connection , when prompted input password : 0000 (four zeros)
- 6) Your phone will confirm that pairing has succeeded. Note that the only light showing on the headset is now the blue one and it will flash once every 5 seconds

## Basic G6 Operation

### Turn on

**Short press (< 1 second) Reset key on the G6.**

Press the Power/ RIDER A key for 6 seconds or so , until the blue lamp illuminate, promptly release the Power/Interphone key, then the blue led will flash every 2-5 seconds, and you can see that on the screen of your cell phone the **G6** will ask your cell phone to connect with it , select ”yes” on your phone then they will connect each other.(for some phones, you will have to connect the **G6** by the phone)

### Turn off

press the Power/Interphone key for 6 seconds or so , until the blue lamp long illuminate, promptly release the Power/RIDER A key then the blue led will extinguish.

**Increase the volume** Short press of the V+ key

**Reduce the volume** Short press of the V- key

**Re-connect the cell phone** For some reason(e.g. In some regions of high RF strength), may the **G6** will lose connection with the cell phone, a short press on the Phone/Play key, they will connect each other again.

## Safe Cell phone calls function

### 1) Receive a cell phone call automatically

When income a cell phone call, you will hear the ring on the cell phone and about 3-5 seconds later, the **G6** will receive the call automatically.

### 2) Terminate cell phone call

When you finish talking on the cell phone, a short press the Phone/Play Key, will terminate the call.

### 3) Reject a cell phone call

When income a cell phone call, you will hear the ring, within 1 second immediately press the Phone/Play key about 2 seconds, it will reject the call.

#### 4) Make a cell phone call

Dial a number on your phone as normal, ( but don't do this if you are on road for your safety) the sound will be automatically heard in your headset  
**notice:** some phones, like Panasonic x70, will not send the audio to the headset, you may have to press the Phone/Play key to transmit the sound to your headset

#### 5) Dial the last number

Press the Phone/Play key 2-3 seconds, it will dial the phone number that you dialed last time. (**note:** some cell phone do not support this function)

### Interphone Function

#### Set up for bike- to- bike and rider-to-pillion intercom: pairing

Pairing is a one time process that is required for mutual recognition between a **G6** and other **G6**.once the two headsets are paired, they will retain paired whenever they are **within range**.

Please note that you can speak via intercom to one buddy headset at a time.

#### Note:

- a. **when you are pairing two G6s, you must keep other G6s in status of power off.**
- b. You could pair your **G6** with maximum total five G6s, you also could only pair your **G6** with one **G6**.
- c. Please **note !** : because the POWER/RIDER **A** key is a multifunctional key, so **once you have defined one of other G6s as rider A, the method that pair your G6 or other G6s with rider A will be different to the way of pairing with rider B, C, D, E, F. before you pair your G6 with another G6(rider A) by POWER/RIDER A key, please confirm your G6 is in status of power off.**

#### 1) Pairing two G6s

Maybe you only need to communicate with a person (a rider or a passenger), you can simply pair two **G6s** according to below step:

To be sure that your **G6** and rider A(another **G6**) are in status of power off.

Short press(< 1 second) Reset key on your **G6** and on another **G6**, simultaneously hold the POWER/RIDER A key on your **G6** and hold the POWER/RIDER A key on another **G6** until the red & blue LED of the two pairing **G6s** flash, **short press** the POWER/RIDER A key **on one of G6**, 5-9 seconds later the red LED of both **G6s** will extinguish and the blue LED then will flash briefly every 2-5 seconds, thus they have finished the pairing(now you could talk with another **G6**).

#### 3) Pairing all G6s

To avoid being confused, please stick respectively 6 label of A, B, C, D, E, F on 6 units of **G6s**

**Note:** one time it only allows one of other five G6s to pair with unit A, and when you are pair two **G6**, please confirm that other units are in status of power off.

## 1. Pair B, C, D, E, F G6s with unit A

### 1.1 Pair unit B with unit A

Power on unit **A**, power on unit **B** (the blue LED of unit **A** and **B** will flash).

Simultaneously hold the **B** key on unit **A** and hold the **A** key on unit **B** until the red & blue LED of the both pairing **G6s** flash, **short press** the **B** key **on unit A**, 5-9 seconds later the red LED of both **G6s** will extinguish and the blue LED then will flash briefly every 2-5 seconds, thus they have finished the pairing (now you could talk each other).

**1.2 Pair unit C, D, E with unit A**, the way is same to above **1.1**. for example, pair unit **C** with unit A as below :

Power on unit **A**, power on unit **C**(the blue LED of unit **A** and **C** will flash).

Simultaneously hold the **C** key on unit **A** and hold the **A** key on unit **C** until the red & blue LED of the two pairing **G6s** flash, **short press** the **C** key **on unit A**, 5-9 seconds later the red LED of both **G6s** will extinguish and the blue LED then will flash briefly every 2-5 seconds, thus they have finished the pairing (now you could talk each other).

### 1.3 Pair unit F with unit A

Because there is not F key on G6, so the way of pairing unit F with unit A is different a bit.

To be sure that unit **A** and **F** is in status of power off,

Simultaneously hold the **A** key on unit **A** and hold the **A** key on unit **F** until the red & blue LED of the both pairing **G6s** flash, **short press** the **A** key **on unit A**, 5-9 seconds later the red LED of both **G6s** will extinguish and the blue LED then will flash briefly every 2-5 seconds, thus they have finished the pairing (now you could talk each other).

## 2. Pairing between unit B, C, D, E

For Example: pair unit B with unit C

Power on unit **B** (the blue LED of unit **B** will flash), Power on unit **C** (the blue LED of unit **C** will flash).

Simultaneously hold the **C** key on unit **B** and hold the **B** key on unit **C** until the red & blue LED of the both pairing **G6s** flash, **short press** the **C** key **on unit B**, 5-9 seconds later the red LED of both **G6s** will extinguish and the blue LED then will flash briefly every 2-5 seconds, thus they have finished the pairing (now you could talk each other).

## 3. Pairing unit B, C, D, E with unit F

Because there is not F key on G6, so the way of pairing unit F with unit B,C,D,E is different a bit.

For Example: pair unit B with unit F

Power on unit **B** (the blue LED of unit **B** will flash), Power on unit **F** (the blue LED of unit **F** will flash).

Simultaneously hold the **B** key on unit **B** and hold the **B** key on unit **F** until the red & blue LED of the both pairing **G6s** flash, **short press** the **B** key **on unit B**, 5-9 seconds later the red LED of both **G6s** will extinguish and the blue LED then will flash briefly every 2-5 seconds, thus they have finished the pairing (now you could talk each other).

To get all pairing details, please refer to below pairing chart,

INTERPHONE	PAIRING BUTTON	STATUS BEFORE PAIRING	WHEN RED AND BLUE LED FLASH ON BOTH UNITS, <b>SHORT</b> PRESS BELOW BUTTON ON LEFT UNIT	<---pair each other--->	INTERPHONE	PAIRING BUTTON	STATUS BEFORE PAIRING
unitA	B	powered on	B	<---pair each other--->	unitB	POWER/A	powered off
unitA	C	powered on	C	<---pair each other--->	unitC	POWER/A	powered off
unitA	D	powered on	D	<---pair each other--->	unitD	POWER/A	powered off
unitA	E	powered on	E	<---pair each other--->	unitE	POWER/A	powered off
unitA	POWER/A	powered off	POWER/A	<---pair each other--->	unitF	POWER/A	powered off
unitB	C	powered on	C	<---pair each other--->	unitC	B	powered on
unitB	D	powered on	D	<---pair each other--->	unitD	B	powered on
unitB	E	powered on	E	<---pair each other--->	unitE	B	powered on
unitB	B	powered on	B	<---pair each other--->	unitF	B	powered on
unitC	D	powered on	D	<---pair each other--->	unitD	C	powered on
unitC	E	powered on	E	<---pair each other--->	unitE	C	powered on
unitC	C	powered on	C	<---pair each other--->	unitF	C	powered on
unitD	E	powered on	E	<---pair each other--->	unitE	D	powered on
unitD	D	powered on	D	<---pair each other--->	unitF	D	powered on
unitE	E	powered on	E	<---pair each other--->	unitF	E	powered on

### 3) Choose which rider you will talk with

Pairing these riders seems a bit complicated, but using the intercom is very simple ☺

After you have paired with all the **G6s** (you also could only pair with 1-4 riders), then you will can talk with one of the riders at a time.

**STEP:** after finishing the pairing procedure, confirm that all of **G6s** have been **powered on**.

Initiate an intercom call (a short press one of intercom key A, B, C, D, E on your **G6**), and then you can talk with one of other riders.

**For example:** A short press(< 1 second) the C Key, promptly release your hand, you will hear a beep “di”, then wait about 3-5 seconds you could talk with rider C. if then you short press the E key, it will change the communication to talk with rider E.

### Tips: Talk with unit F

Because there is not **F** key on the unit, so the way of calling unit **F** is different:

Short press A key on unit A, you will talk with **F**. Short press B key on unit B, you will talk with **F**.

.....Short press E key on unit E, you will talk with **F**.

### Finish an interphone talking

You only need a short press of same one of the intercom (A, B, C, D, E) key, to terminate communications

*Note: to reduce power consumption, when you do not need to talk, don't keep your G6 on intercom state in a long time*

*Note: If two G6s were out of range, they may will lose connection. when you come within range, you only need to initiate a intercom as normal.*

## Music /Audio function

### 1) listen to audio navigation info from your GPS which with a built in bluetooth transmitter

#### a) Pair this GPS with your G6

Be sure that you have turned off the bluetooth function on your mobile phone.

Be sure that the **G6** is in the state of power off.

Power on the GPS, hold the bluetooth key on the GPS until the red & blue LED flash.

Long press the POWER/Rider A key on the G6, until the red & blue LED flash.

About several seconds later, the red LED of the GPS and the **G6** will extinguish at the same time, thus they have paired successfully.

#### b) Enjoy audio info of the GPS on the G6.

Adjust screen tap sound and volume to an appropriate level on the GPS, then the user can enjoy the audio information on the **G6**.

**Note:** please obey the bluetooth Power On sequence as below:

G6 first , then GPS.

please obey the bluetooth Power Off sequence as below:

GPS first, then **G6**

### 2) Listen to stereo music from your A2DP enabled cell phone

Read the user manual of your cell phone carefully, if your cell phone is A2DP enabled, the **G6** can receive the stereo music from the cell phone.

Please note that only A2DP (stereo bluetooth) enabled cell phone can offer bluetooth music transmitting service. You can use the Phone/Play key to pause/play the music from A2DP bluetooth devices.

### 3) Listen to music from some mono bluetooth enabled cell phone

Almost all of Nokia mono bluetooth enabled cell phone can offer bluetooth music transmitting service, but some model of other brand cell phone can not offer this service.

*We do not promise that the G6 will support music function for all mono bluetooth enabled cell phones.*

**Step:** confirm that your **G6** has paired with your cell phone; play the music on the cell phone, and then you can enjoy the music on your **G6**.

Note: for mono bluetooth cell phone, you can not use the Phone/Play key to operate the music, you only can operate the music on the phone.

### 4) listen to stereo music from your MP3 by Wired method

2.5-3.5mm audio adapter cable

With the 2.5-3.5mm audio adapter cable attached, it will can be used for connecting your **G6** with a major of MP3. play the MP3, you will can listen to the music via the speakers of your **G6**.

**NOTE1:** when the **G6** is working in bluetooth status, it will mute the music of the MP3. bluetooth is prior. After bluetooth operation is finished, it will return to play the MP3 music.

**NOTE2:** you only can adjust the music volume on your MP3.

#### **5) listen to audio navigation info from your GPS by Wired method**

the way is same to listening to music from a MP3.

#### **6) listen to stereo music from MP3 via external audio bluetooth transmitter**

If you have a external audio bluetooth transmitter (it is easy to find this product in the market), insert the plug of the transmitter into the jack of the MP3.

Pair the transmitter with the **G6** according to the instruction manual of the transmitter.

Play the MP3, you can listen to the music on your **G6**.

#### **7) listen to audio navigation info from your GPS via external bluetooth transmitter**

The way is similar to **5) above**.

#### **8) listen to stereo music from MP3 which with a built in bluetooth transmitter**

please familiarize yourself with Bluetooth function of your Bluetooth enabled MP3(**this MP3 must has Bluetooth transmitting function**). read the instruction manual that came with the MP3 so you can enable its bluetooth function. pair the MP3 with the **G6** according to the instruction manual of the MP3. play the MP3, you can listen to the music on your **G6**.

### **Auto switch between different operations**

While talking by intercom or listening to music, if it incomes a cell phone call, the voice will be switched to “cell phone talking” state automatically. After the call has been hung up, the system will auto return to intercom talking or music playing state.

While listening to music, short press the RIDER A or RIDER B, C, D, E key, it will initiate a intercom talking. after terminating the intercom talking, the system will return to the music automatically.

**Note:** it might needs about 5 seconds to auto-return to “intercom talking” state after the “cell phone talking” has been hung up.

## **Trouble shooting**

### **1. not working**

Could be a flat battery , charge the G6 3 hours.

### **2. Reset**

In some regions of high RF strength ie near high power TV transmitters, GSM station or airport radars, these can overwhelm the CPU in the G6 causing it to latch up.

**Short press (< 1 second) Reset key on the G6.**when you turn on the **G6**, it will work normally again.

### **3. No sound**

Physically check to see the headset cables are ok or **the audio plug is real inserted in the jack?** swap with the other functioning **G6** to localize the problem. have you turned to volume too low?

### **4. Whistling of the speakers**

If the microphone is too closed a speaker, the speaker will make a whistling, take the microphone away from the speaker, reduce the volume by the Volume-key, it will be ok.

### **5.Lose connection with the cell phone or music from the cell phone**

For some reason (e.g. in some regions of high RF strength), maybe the **G6** will lose connection with the cell phone or music from the cell phone, a short press on the Phone/Play key, they will connect each other. or see the below **8**.

## **6. can not connect with your mobile phone**

This **G6** can connect with a major of bluetooth enabled cell phone of main brand, but **we don't undertake that it can connect with all cell phone**. Before purchasing, please confirm that if the **G6** could connect with your cell phone.

## **7. auto-power off**

To cell phone call, intercom, music these different using, This **G6** takes different Bluetooth profile. when change between different using, it will change to the corresponding profile.

Some cell phone maybe do not take standard bluetooth profile, when it connect with the **G6**, some times it may cause turning the **G6** off when the **G6** are switching between three different state(call, intercom, music ). in this case, you could turn on the **G6** again by pressing the Power/Interphone key, and note that only make the **G6** working on two profile.

## **8. Final solution**

If the solution of above clause1.- 7.can not resolve the problem, turn your cell phone off (sometimes you may have to take off the battery of your cell phone and load the battery again) and your **G6**, then turn them on and pair them again.

## **9. Lose connection between two G6s**

If two **G6s** were out of range, they may will lose connection. when you come within range, you only need to initiate a intercom as normal.

## **OTHER FEATURES**

- Digital Signal Processor (DSP) Technology for wind noise cancellation
- Excellent performance at speeds up to the legal limit with a full face helmet
- Easily mounts to all full face and open face helmets

### **GENERAL FEATURE**

- Up to 7 hours talk time when connected to your cell phone
- UP to 7 hours time when listening to music
- 500 mAh Li Polymer battery ·Standby time: 120 hours
- Charging time:~ 3 hours
- Chip brand: CSR

### **SPECIAL FEATURE**

- All weather, rain and snow resistance

**Thank you for using the G6 BT Interphone !**

***G6 motorcycle multi-interphone***
